

Google Fiber Repeat Calls

Repeats by Month • The chart shows the number of repeat calls received by customer service each month. Contacts_N is the customer's first contact date. Subsequent columns show the number of contacts made during the next seven days. For instance, 1,636 customers called again one day after their initial contact, but only 575 customers called again seven days later in January. • The second chart illustrates the percentage of first contact calls by day of the week. In January, only 8.71% of customers initiated contact on Sunday. The majority of customers initiated contact on the first working day of January.
